1. Applicant's election without traverse of Group III, claims 6-23 in the reply filed on June 16, 2005 is acknowledged.

2. Claims 1-5 and 24-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 16, 2005.

3. Claims 6-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, "said molding die" in the third step lacks antecedent basis within the claims. Claim 9 is indefinite due to the use of "solving" on line 5. Clarification is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 7, 16, 17 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kumasaka et al. (4,338,271). Kumasaka et al. disclose the basic claimed method of manufacturing shoe components using an EVA based composition including (1) a first step of cutting an EVA copolymer film or sheet having a thickness of 0.01 to 2 mm (column 10, line 45), (2) stacking or combining the cut films or sheets into the cavity of a mold, (3) covering the mold and applying heat and pressure (column 2, lines 31-33), and (4) releasing pressure from the molding, removing the cover and producing foam.

Kumasaka et al. teach a thickness within the range of claim 7, an EVA sheet, as in claim 16, an EVA copolymer preform, as in claim 17 and the use of a structure or bar, as in claim 20, to form a space in the stacked sheets or films (column 8, lines 1-12)

5.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6.Claims 8-13, 18-19 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kumasaka et al. (4,338,271). Kumasaka et al. teach the inclusion of additives including colorant material into the molding material at column 3, lines 1-5. Thus, it would have been obvious to one of ordinary skill in the art to provide components for forming the mixtures described in claims 8-13 and 18-19 in order to enhance the physical properties of the shoe component. The examiner takes Official Notice that it is known to compression mold or re-mold EVA shoe component material in order to create a final desired shape, as in claims 21-23.

7.Claims 14-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
